Superfund Site Strategy Recommendation
Advanced Graphics Technologies, Inc.

DISCUSSION

The Advanced Graphics Technologies, Inc. site is an active manufacturing facility. The site was formerly used as a chrome plating facility. The facility is permitted under RCRA.

HRS pathway analysis indicated the following. Ground water is not used in the area as a drinking water source; therefore, a threat via this pathway does not exist. Surface water must migrate over 2 miles before reaching the nearest perennial stream; therefore, under the HRS, the surface water pathway is not considered threatened. Since the entire site is covered with concrete, a threat via soil exposure and air migration pathways does not exist.

Due to the lack of a hazardous waste migration potential, the Advanced Graphics Technologies, Inc. site does not meet the minimum criteria of a viable candidate for inclusion on the Superfund National Priorities List; therefore, the site is designated a disposition of No Further Remedial Action Planned (NFRAP), and at this time does not warrant further investigation under Superfund.

This site is being referred to the State of Texas for any appropriate action under the state's regulations.

APPROVALS

Disposition Recommended by: Lon Biasco Signature:  Date: 11/1/95
(Site Assessment Manager)

Disposition Recommended by: Ragan Broyles Signature:  Date: 11/02/95
(Section Chief)

Disposition Approved by: Charles A. Gazda Signature:  Date: 11/02/95
